

Zoé Aubry

Zoé Aubry and Intervalle begin their collaboration in 2022. The Swiss artist seduced the gallery with her demanding and committed work. In its thinking form, its work is freedom, concern, research, cohesion, complicity, juggling between critical, poetic and political dimensions. Based on anthropological investigations, his approach is built on a relationship between social phenomena and individual experiences. Creating spaces of confrontation, his work is a critique of contemporary society. The images of her work will be published very soon on this site.
