Press Release

Honor the artists, understand their universe, share the strength of their creation.

Observe spaces, all spaces: from the white cube to the city. Make unique experiences, dream, give to see; wake up the senses.

Encourage meetings between artists and their audience. Analyze new uses, new cultural practices; to ennoble everyday life through artistic experience.

With a ccr oc he, we imagine tailor-made collaborations with recognized and emerging artists; we build the most relevant proposition for each context, unconditionally placing the artist at the heart of the experience!
